APPLICANT: Napier, Mary A.

APPLICANT: Napier, Mary A.

APPLICANT: Pan, James;

APPLICANT: Pan, James;

APPLICANT: Pan, James;

APPLICANT: Roy, Margaret Ann
APPLICANT: Shelton, David L.

APPLICANT: Stewart, Timothy A.

APPLICANT: Tumas, Daniel

APPLICANT: Tumas, Daniel

APPLICANT: Williams, P. Mickey

APPLICANT: Wood, William I.

TITLE OF INVENTION: Secreted and Transmembrane Polypeptides and Nucleic

TITLE OF INVENTION: Acids Encoding the Same

FILE REFERENCE: P2630PLC1

CURRENT APPLICATION NUMBER: US/09/978,295A

CURRENT FILING DATE: 2001-01-15

PRIOR APPLICATION NUMBER: 60/062250

PRIOR APPLICATION NUMBER: 60/062250

PRIOR FILING DATE: 1997-10-17
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      RESULT 1

"Association of chondroadherin with collagen type II.";

J. Blol. Chem. 276:3288-32886(2001).

-1- FUNCTION: Promotes attachment of chondrocytes, fibroblasts, and osteoblasts. This binding is mediated (at least for chondrocytes and fibroblasts) by the integrin alpha(2)beta(1). May play an important role in the regulation of chondrocyte growth and proliferation (By similarity).

-1- SUBUNIT: Mostly monomeric (By similarity). Interacts with collage.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       J.
